HCoating

Anti Fog Coatings

HCoating AF / anti-fog coating, NF / no-fog coating, and FP / fog proof coating offer permanent anti fog performance, require no reactivation of anti-fog property, are applied onto lenses by existing coating machines in optical labs.

These coatings are UV curable to form thin films, which prevent glasses fogging in the situation from cold to warm environment, facing steam vapor, wearing mask and swimming goggles, etc. After curing, they are strong enough to withstand fingernail scratches, routine cleaning wipes, and water rinsing without losing anti-fog property for years. Medical professionals and ordinary people welcome anti-fog glasses.

Rating, higher rating number, better property. Click to order, free shipping for regular-price order on www.hcoating.com/product.html

Anti-fog Coating AF

HCoating - **AF**: $190 – SHOW SPECIAL, 110 g bottle, offers permanent anti-fog performance, primer free adhesion on all lenses, cured under UV in 30 seconds, may need additional heat curing.
Rating:
Hardness, 3.
Tintability, 5.
Adhesion, 5.
Clarity (less yellow), 3.
Anti-Fog, 5.

No-fog Coating NF

HCoating - **NF**: $150 – SHOW SPECIAL, 110 g bottle, offers permanent anti-fog performance, primer free adhesion on polycarbonate, fast UV cure, compatible with AR.
Rating:
Hardness, 3.
Tintability, 5.

Adhesion, 3.
A/R compatibility, 4.
Photochromic compatibility, 4.
Clarity (less yellow), 3.
Anti-Fog, 5.

Fog Proof Topcoat FP

HCoating - **FP**: $150 – SHOW SPECIAL, 110 g bottle, offers permanent anti-fog performance, fast UV cure, designed as topcoat on AR and Photochromic coatings.
Rating:
Hardness, 3.
Tintability, 5.
Adhesion, 3.
A/R compatibility, 4.
Photochromic compatibility, 5.
Clarity (less yellow), 3.
Anti-Fog, 5.
