HCoating

Next Generation Hard Coat

The next generation hard coatings – HCoating **ST**, **HD**, **TD**, **SC** are made from a combination of Intra-Molecular Altering (IMA) technology and Nano technology, resulting in the UV curable spin hard coatings. Besides superior adhesion on all lenses, the benefits of new generation coatings are uniform liquid, stable low viscosity, constant spray height, self-defoaming, reduced rainbow effect, and compatible with AR coatings.

Rating, higher rating number, better property. Click to order, free shipping for regular-price order on www.hcoating.com/product.html

ST Low-Cost Nano Coating

HCoating - **ST**: $150 – SHOW SPECIAL, 110 g bottle, low-cost nano coating, tintable, the most stable coating with extended service life in machine operation.
Rating:
Hardness, 4.
Tintability, 5.
Adhesion, 4.5.
A/R compatibility, 5.
Clarity (less yellow), 5.

HD Harder Coating Tintable

HCoating - **HD**: $190 – SHOW SPECIAL, 110 g bottle, well balanced between hardness and tintability, favored by big labs in continuous operations.
Rating:
Hardness, 5.
Tintability, 4.5.
Adhesion, 5.
A/R compatibility, 5.
Clarity (less yellow), 5.

TD Tintable Hard Coat

HCoating - **TD**: $175 – SHOW SPECIAL, 110 g bottle, faster and darker tinting, favored by low volume users and small labs.

Rating:
Hardness, 4.5.
Tintability, 5.
Adhesion, 5.
A/R compatibility, 5.
Clarity (less yellow), 5.

Super Coat Hardest

HCoating - **SC**: $190 – SHOW SPECIAL, 110 g bottle, extremely hard, less tintable, designed for high volume users and big labs, within or beyond eyeglasses applications.

Rating:
Hardness, 5+.
Tintability, 4.
Adhesion, 5.
A/R compatibility, 5.
Clarity (less yellow), 5.
